

It seems the You folks in washington have a hard time
"reading" what might be going on in the minds of the average
American. I don't mean to say your bad people,I just think Your
trying to fly a DC-10 by remote control as oposed to being in
"the cockpit" Remember that the choices you make will also
effect you and your family as well. The air-waves are already
owned and operated by to few companys. The music end of
this mess is just horrid..An incredibly small number of writers
and musicians are heard as it is. News on cable AND the
networks is so filled with fluffy NON NEWS stories and Political
ass kissing that it is very dificult to find out what's going on.
News radio is the same every where you go, in the whole
damn country. On June 2nd. Please consider these things.
Also think about The concept of "the public trust".

Thanks,..... John Ivan Greilick.....Audio engineer/ Musician.
